

Passive & Intelligent Wiegand Splitters

Split or merge reader data

CYPRESS
INTEGRATION SOLUTIONS

OPTW-100

Passive Wiegand Splitter OPTW-100

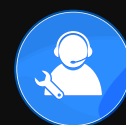

- **How to Use:**

- Connect 2 readers to one access control system, reducing Wiegand ports
- Connect 1 reader with 2 different access control systems
- Resolve electrical incompatibilities, ground potential or voltage level issues

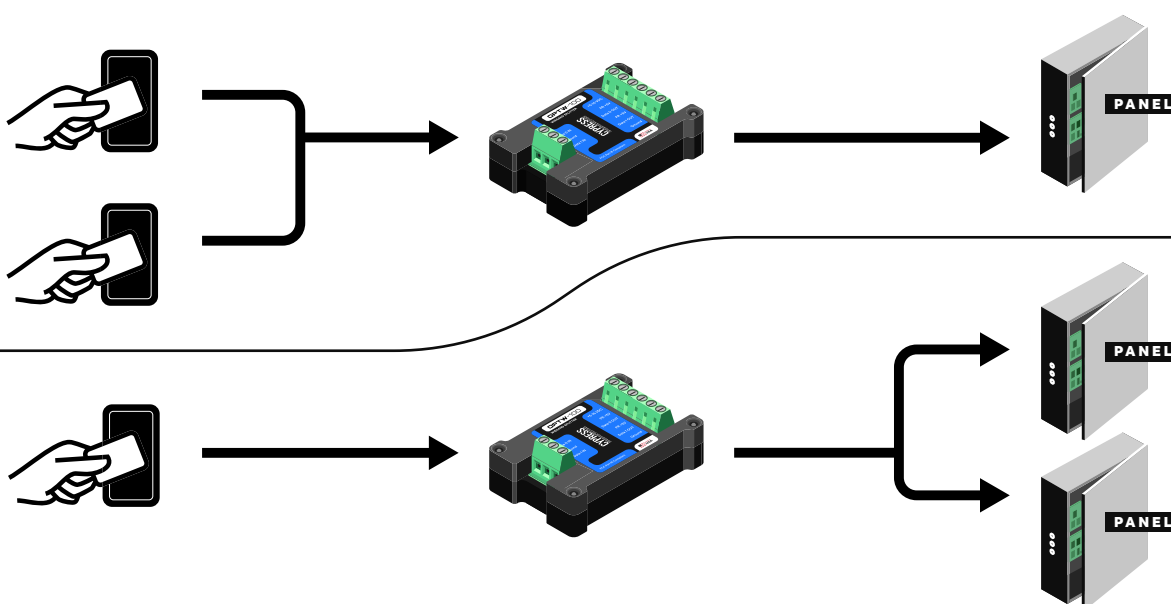

- **Applications:**

- Vehicle gates with high & low readers
- Doors/gates with In/Out readers
- Multi-tenant sites with tenant and base building systems (data is sent to both systems)
- Secured Assets: Pharmaceutical storage cabinets with readers

- **Note: Intelligent Splitters** are also available (see reverse side)

**U.S. TECH
SUPPORT**

Intelligent Wiegand Splitter CVX-OPTS

- **Overview:**
 - 1 reader sends data to 2 access control systems
 - Directs reader data to appropriate panel
 - Reader data directed to specific system by card format and facility code list, multiple card formats and facility codes supported
- **Typical Application:**
 - Commercial multi-tenant spaces where tenants do not want reader data shared with other tenant or base building system
- **Custom engineering required;** contact Cypress
- **Note: Passive Wiegand Splitters** are also available (see reverse side)
